I am going to show you a list of reasons why some people have not been tested for HIV (the virus that causes AIDS).

Which one of these would you say is the MAIN reason why you have not been tested?

It's unlikely you've been exposed to HIV

You were afraid to find out if you were HIV positive (that you had HIV)

You didn't want to think about HIV or about being HIV positive

You were worried your name would be reported to the government if you tested positive

You didn't know where to get tested

You don't like needles

You were afraid of losing job, insurance, housing, friends, family, if people knew you were positive for AIDS infection

Some other reason

No particular reason
